TARGET

EXCLUSIVELY FOR GARMENTS INDUSTRIES

A PRODUCT OF
ASK TECHNOLOGY

ABOUT

ASK TECHNOLOGY

ASK Technology incorporated in 2004 as an entity promoted by well-qualified engineers, computer professionals and businessmen specialized in IT Enabled Services, ERP Solution, Material Management Software, Order Management Software, Asset Management, HR & Payroll Solution with Attendance Reader interface and Exclusive ERP for apparel Manufacturing industries, who bring with them several years of business and professional experience. This rich experience of promoters in various industries helps the organization assimilate customer requirement at a faster pace.

Our Vision

Perfection through innovation

Set the constant innovation as our key for achieving the ultimate goal of success and emerge as a global company by providing the superior quality services and solutions

In the global business arena, the world has been divided into small platforms in order to deliver the market requisites in no time. The rapid growth and mind-boggling pace of changes in the technology has compelled the business world to integrate for the latest technology amendments. The changing face of technology has rendered a different dimension to the vision of management gurus in the business world. Amalgamation of new concepts and techniques with business has become an advanced mantra for the business realm

ASK TECHNOLOGY routinely meets myriad challenges in the technology arena and synchronizes solutions to meet the changing faces of the business world. We help you adhere to your strict schedules and deadlines and thereby serve your customer better.

Our Mission

Excellence in customer's need based solutions and services

We strive to deliver outstanding quality of work through a dedicated team of professionals using Innovative Ideas and Flexible working methods. We always keep in mind, the trust and mutual respect required by our clients in all aspects of our business and ensures the same by our high levels of integrity.

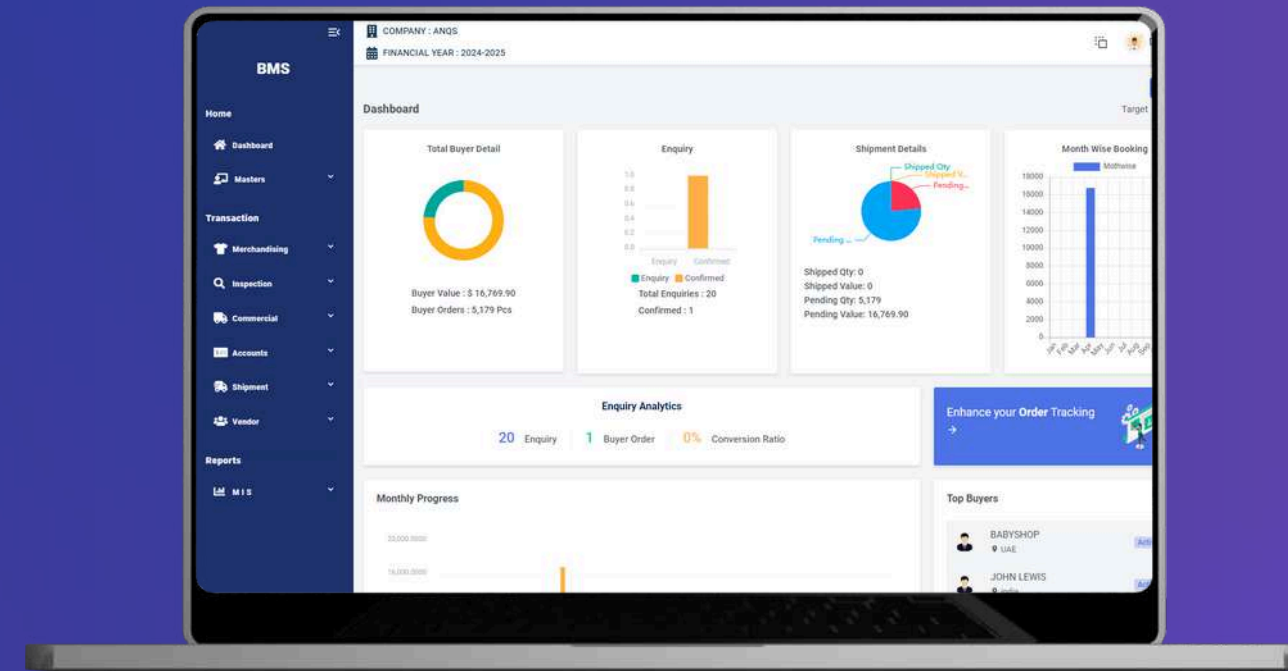

Our Expertise

Explore the robust technologies we master, powering our innovative solutions and driving digital transformation

Introduction to Asktek Apparel ERP & PLM

Asktek Apparel ERP & PLM is a comprehensive enterprise solution designed specifically for the apparel industry. It seamlessly integrates ERP (Enterprise Resource Planning) and PLM (Product Lifecycle Management) functionalities to streamline business processes from enquiry and product development to production, inventory management, and export documentation. With advanced MIS reporting, real-time analytics, and automated planning, Asktek Apparel ERP & PLM enhances efficiency, improves decision-making, and ensures on-time delivery while optimizing resource usage for garment businesses.

ASKTEK ERP & PLM FEATURES

Asktek Apparel ERP optimizes business operations with MIS Reporting for real-time insights into orders and production. Automated Time & Action (T&A) Planning ensures timely task execution, while Inventory & BOM Management streamlines material planning and control, reducing waste.

01

Advanced MIS Reporting

Real-time, customizable reports for order tracking, production status, and costing summaries.

02

Automated Time & Action (T&A) Planning

Auto-generates production and purchase schedules with email reminders for important milestones.

03

Inventory & BOM Management:

Real-time tracking of materials, automated Bill of Materials (BOM) generation for accurate material planning

04

Sample Development & Tracking

Manages the entire sample approval process with job assignments, completions, and internal approvals.

05

Pattern & Marking Management

Detailed tracking of pattern creation, job allocation, and pattern specifications for efficient production.

06

Product Development Workflow

Streamlines collaboration across departments from design to cost estimation and approval.

The PLM module enhances product lifecycle management, with Sample Development & Tracking for overseeing approvals, and Pattern & Marking Management for precise pattern creation. The Product Development Workflow ensures smooth collaboration from design to production, speeding up product launches.

Buyer Costing

Effortlessly generate and customize garment costing in alignment with buyer requirements, ensuring accuracy and competitiveness in pricing.

Asktek - ERP

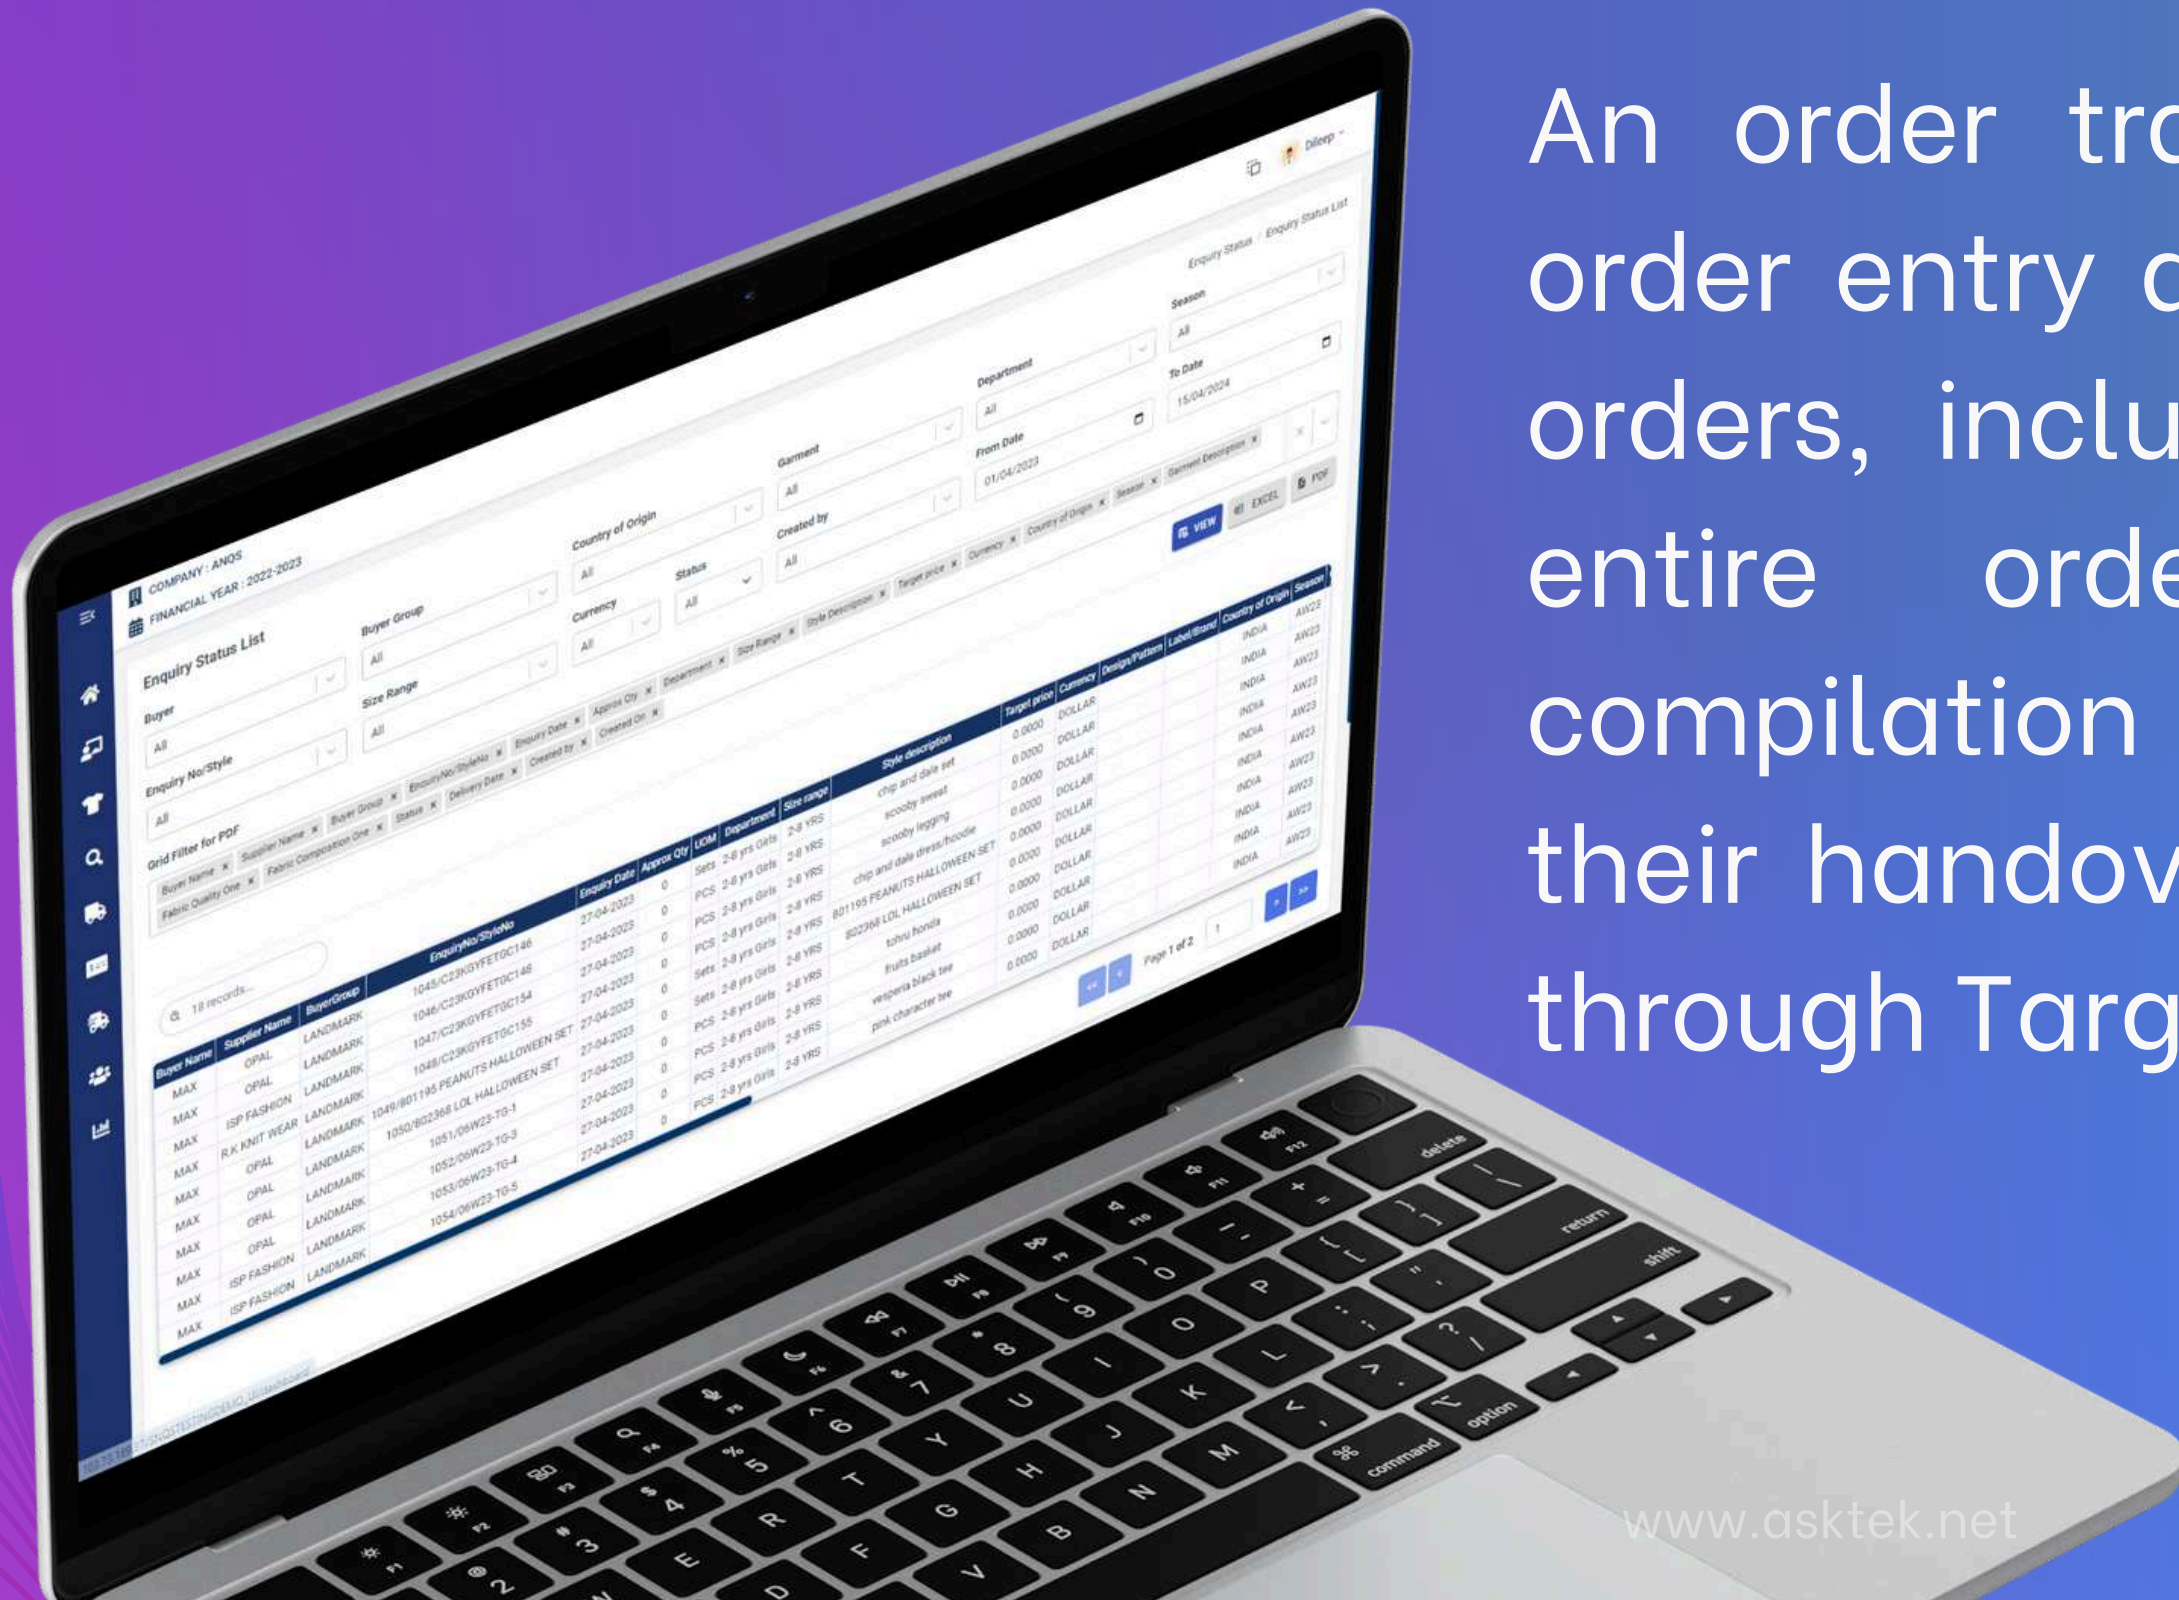

Buyer Order Management

Seamlessly handle all aspects of buyer orders, from initial inquiry to direct order creation, enhancing efficiency and customer satisfaction.

ENQUIRY MANAGEMENT VS ORDER TRACKING SYSTEM

An order tracking solution handles order entry details and the status of orders, including delivery time. The entire order cycle, from the compilation of backend products to their handover, is flawlessly tracked through Target BMS.

Time and Action Planning

Track and manage planned execution dates versus actual execution timelines, facilitating on-time delivery and efficient resource allocation.

PURCHASE MANAGMENT

Our software simplifies purchasing by combining orders, tracking vendors by reorder levels, and automating billing based on received quantities—ensuring smooth procurement and timely production.

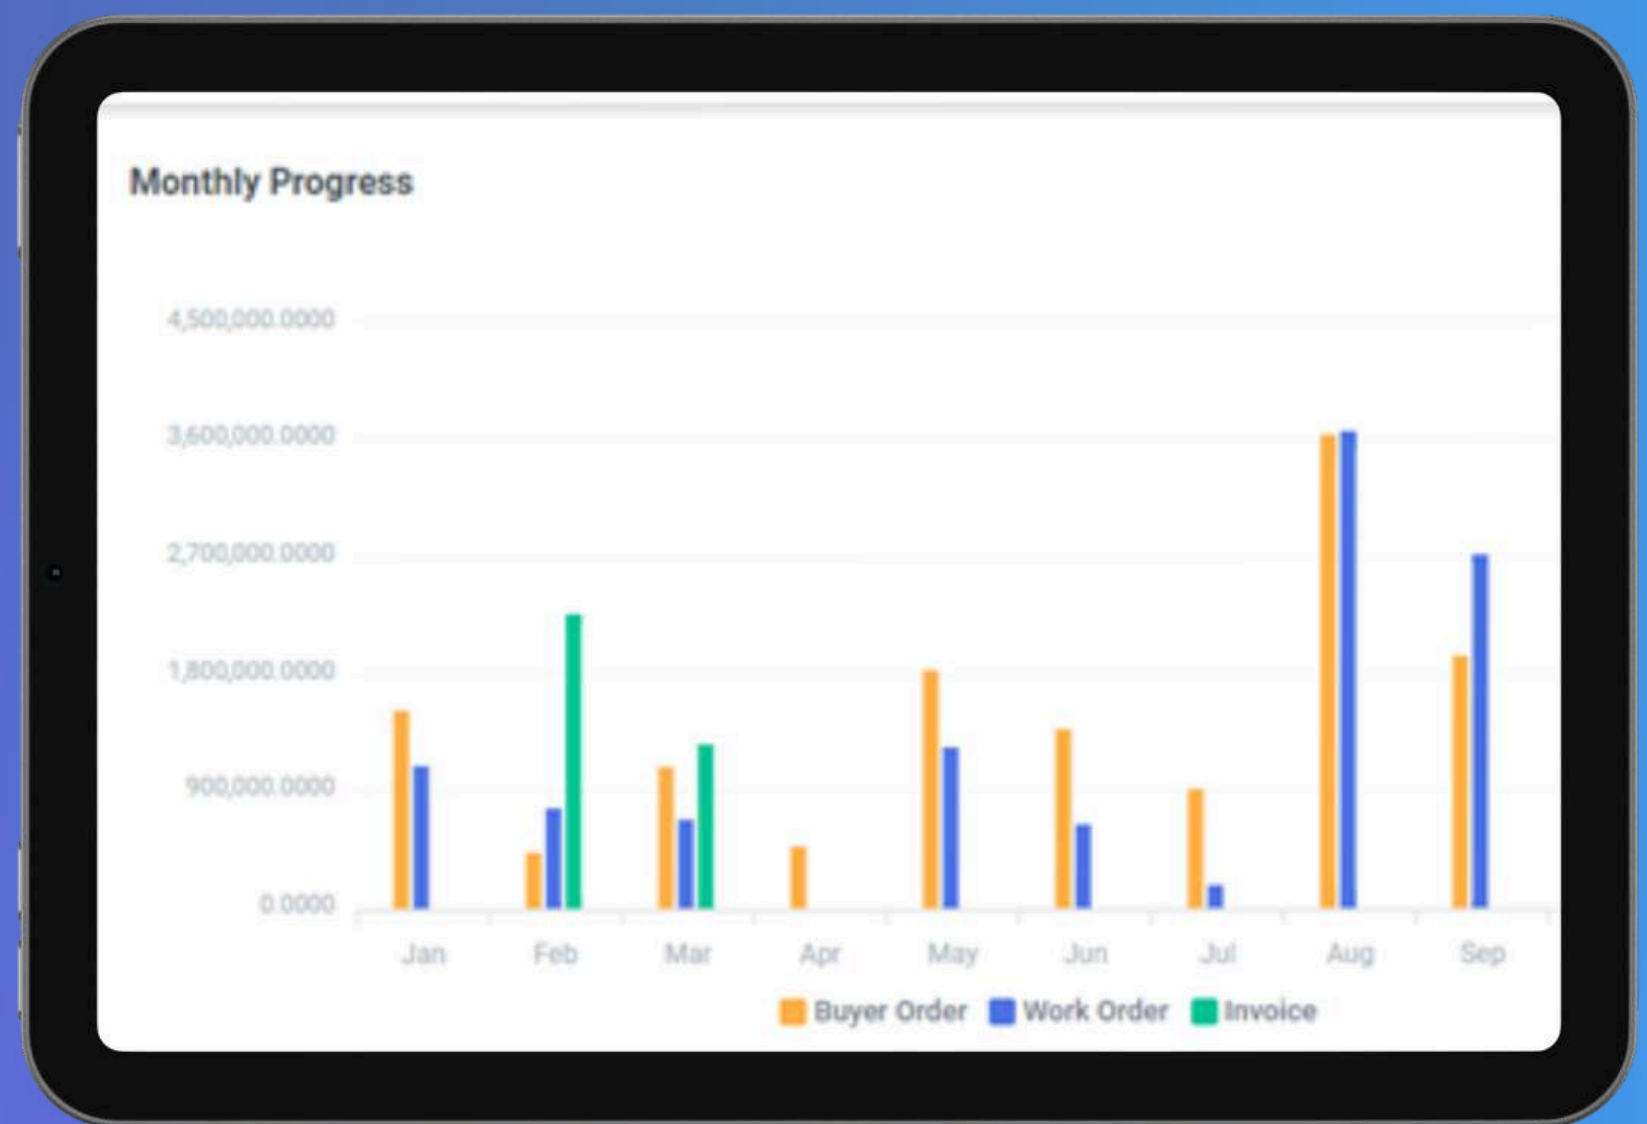

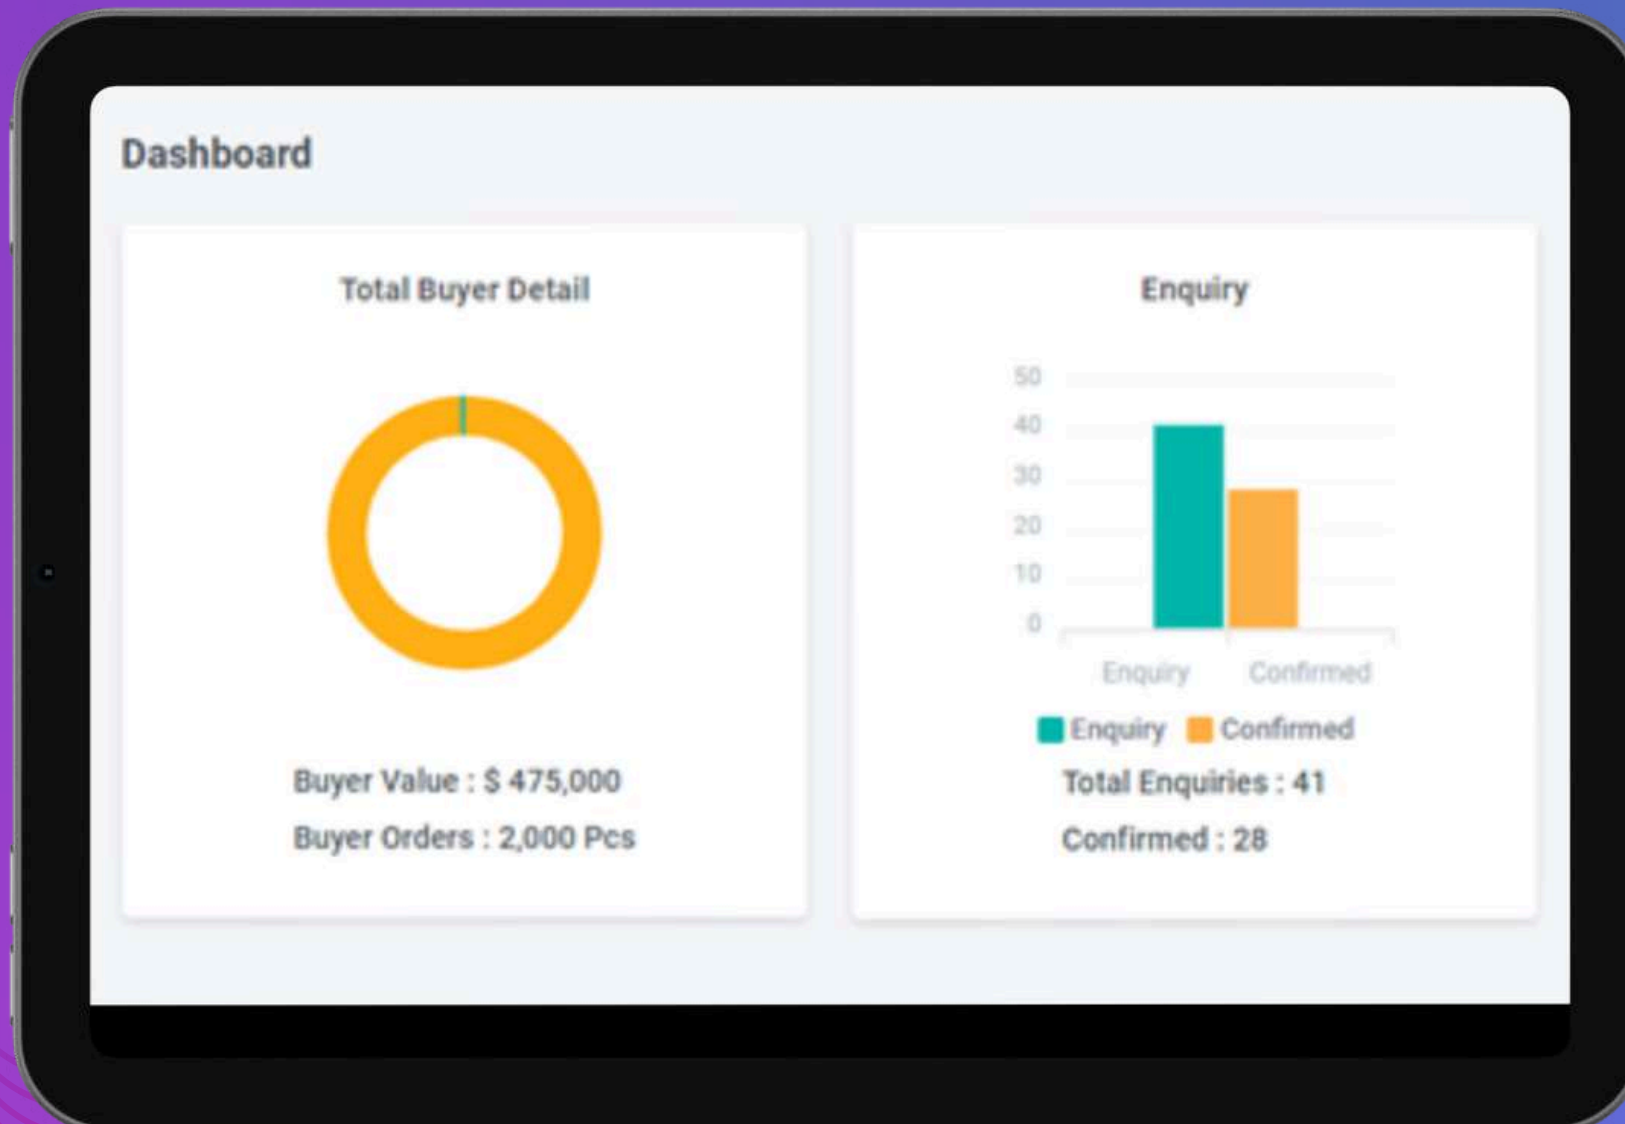

INVENTORY MANAGMENT

Our inventory method enables precise tracking by style, buyer, and unit, providing accurate stock usage insights. It helps optimize stock allocation, allowing you to reuse available stock for future orders, improving efficiency and reducing waste.

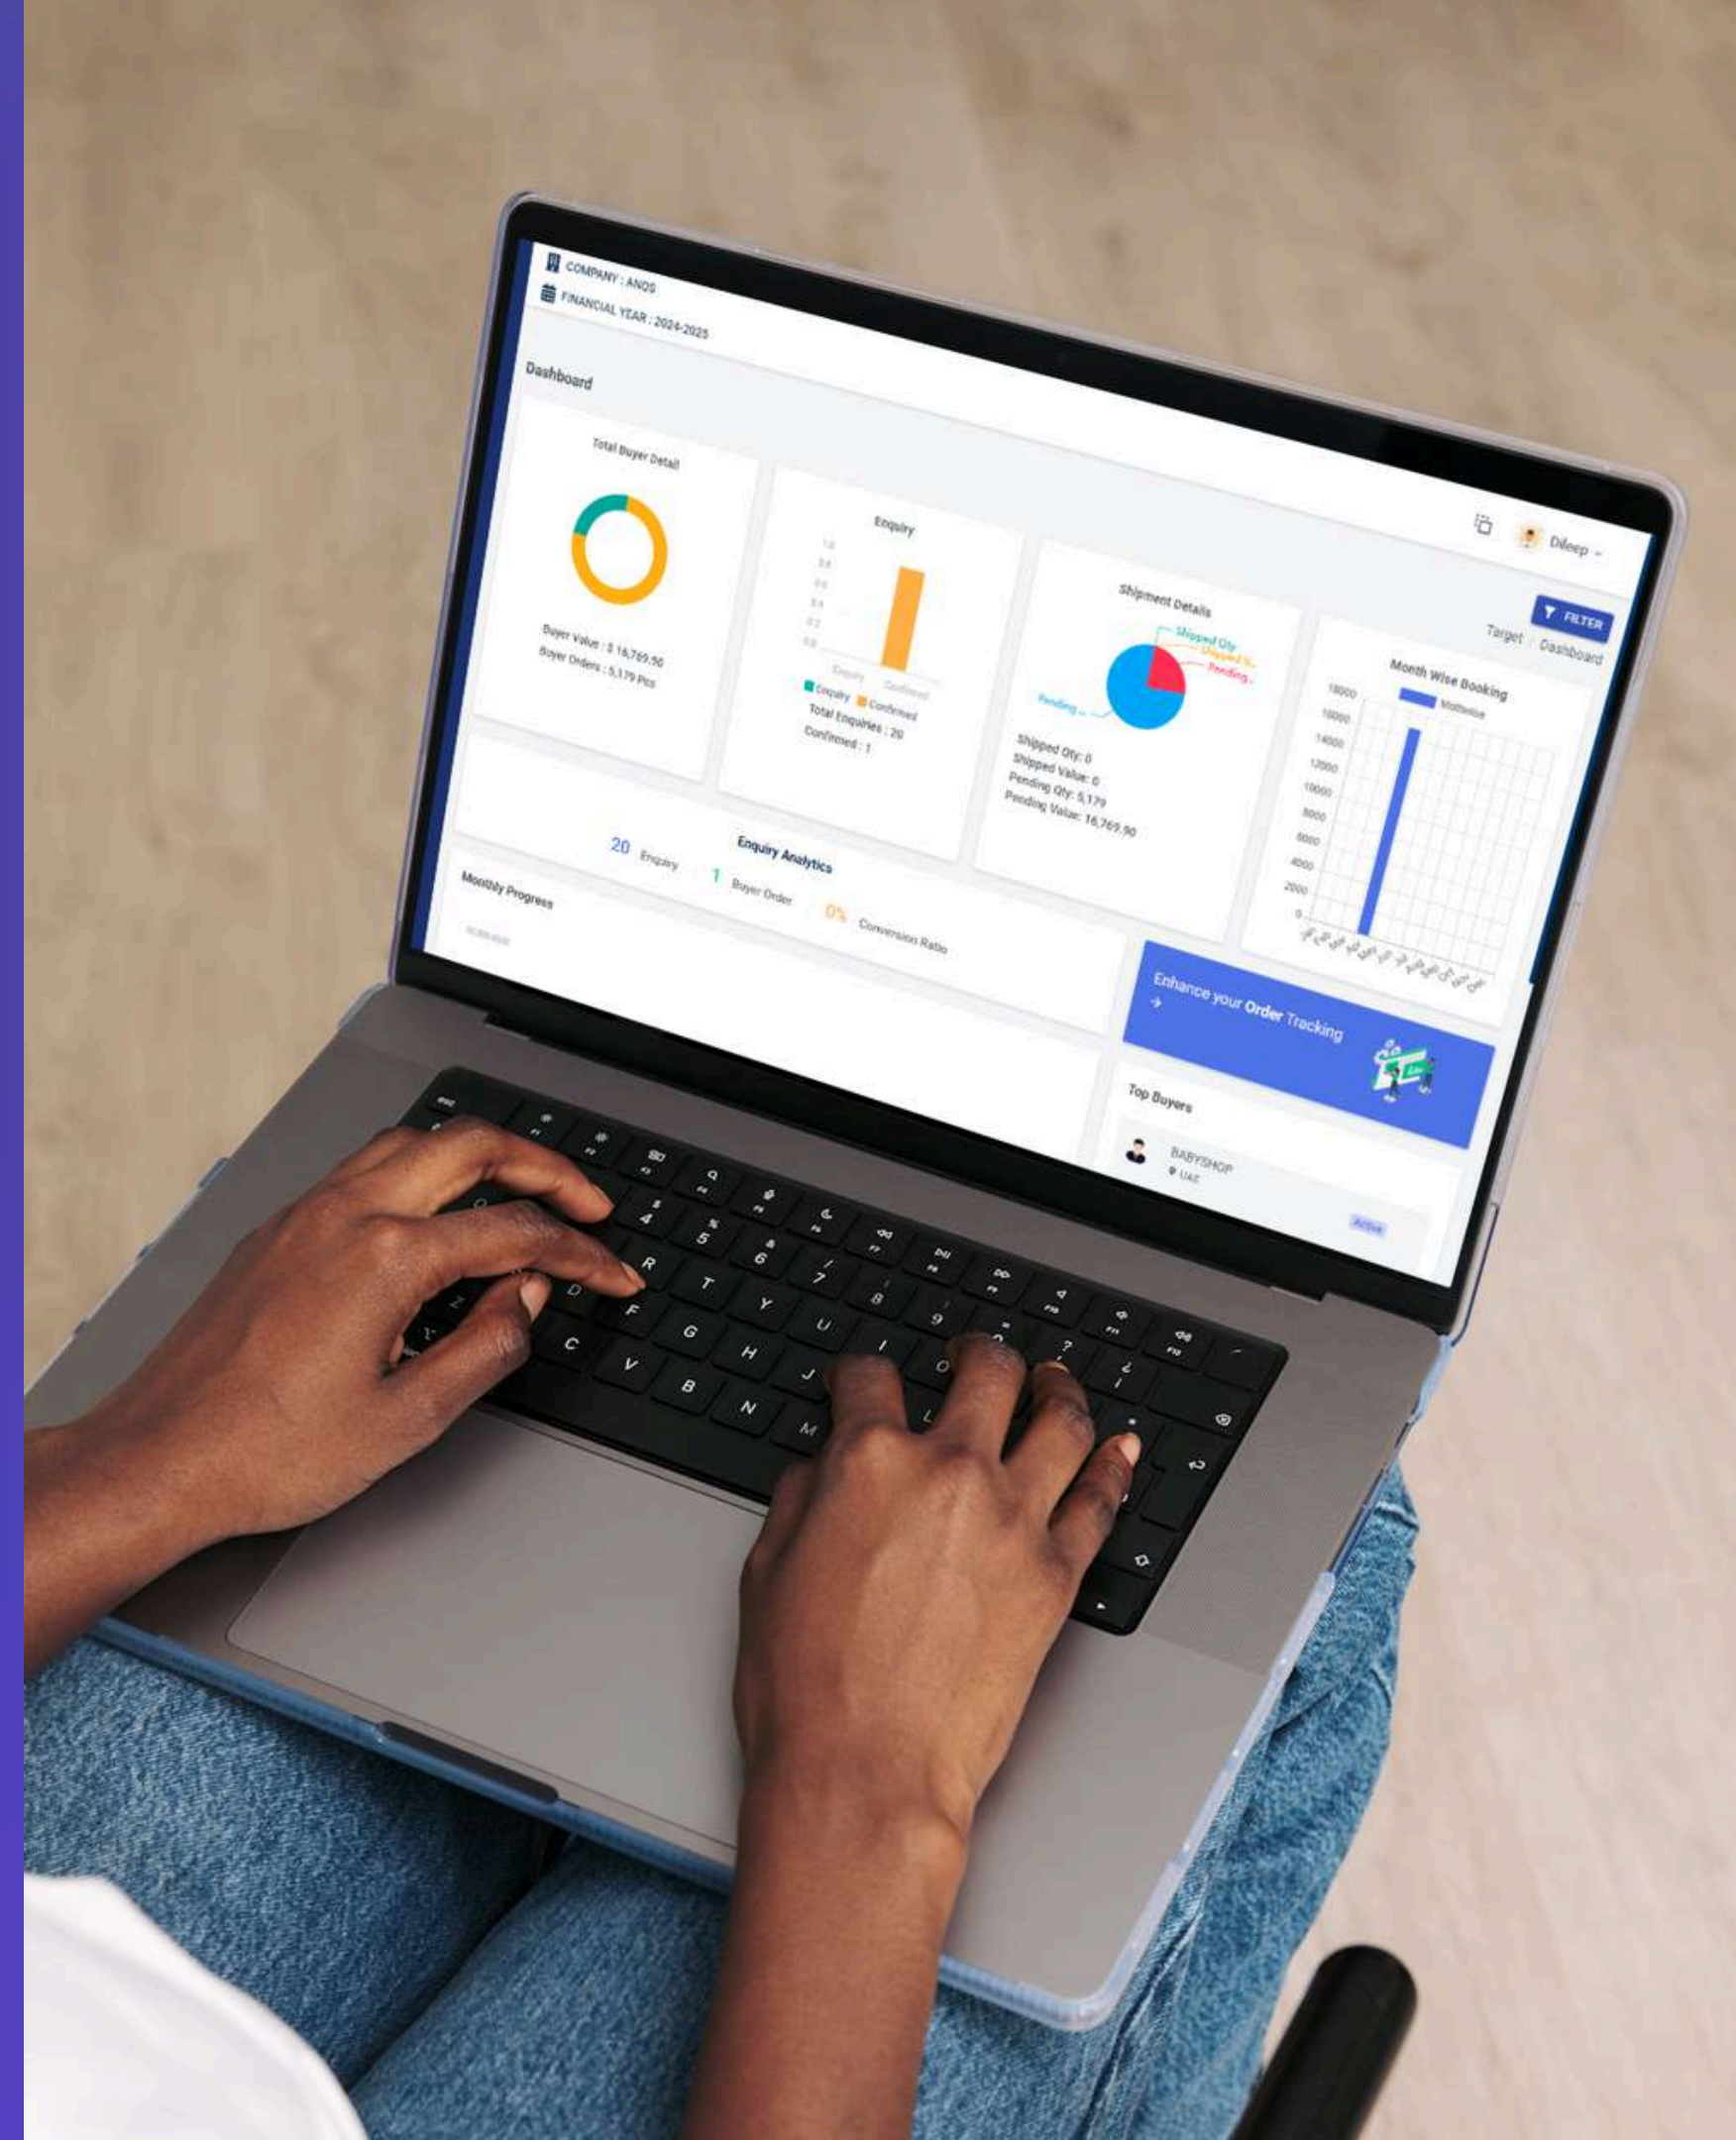

REAL-TIME REPORTING AND ALERTS

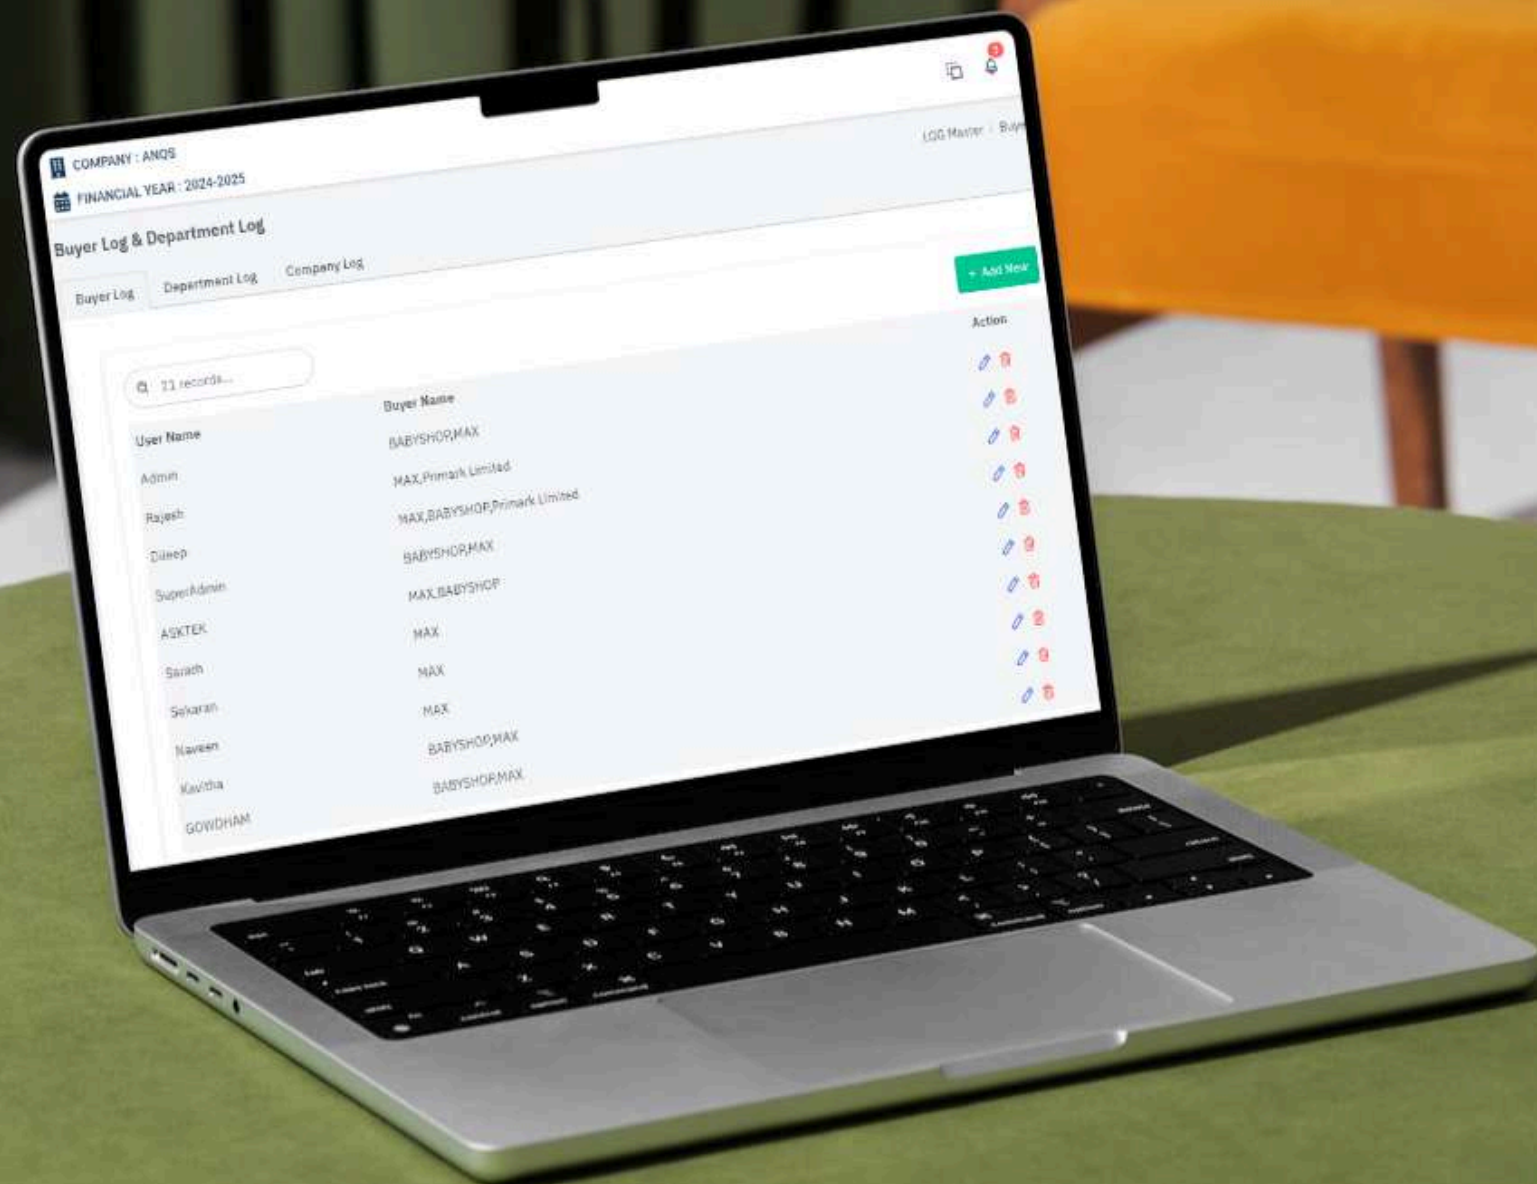

Stay ahead of the curve with real-time notifications, ensuring you're always in the loop regarding critical occurrences such as delayed shipments and deviations from planned tasks. This proactive approach empowers you to take swift action, swiftly resolving any issues that may arise.

Access Control Management

Multi-level access control ensures only authorized personnel can access sensitive data. Access the entire organization structure from anywhere through our cloud server integrated solution.

Log Based Buyer Access

operates on a highly secure log-based access system, enhancing overall security and ensuring authorized user stability. Stay confident knowing that your operations are safeguarded against unauthorized access, allowing you to focus on your core tasks with peace of mind.

FLOW

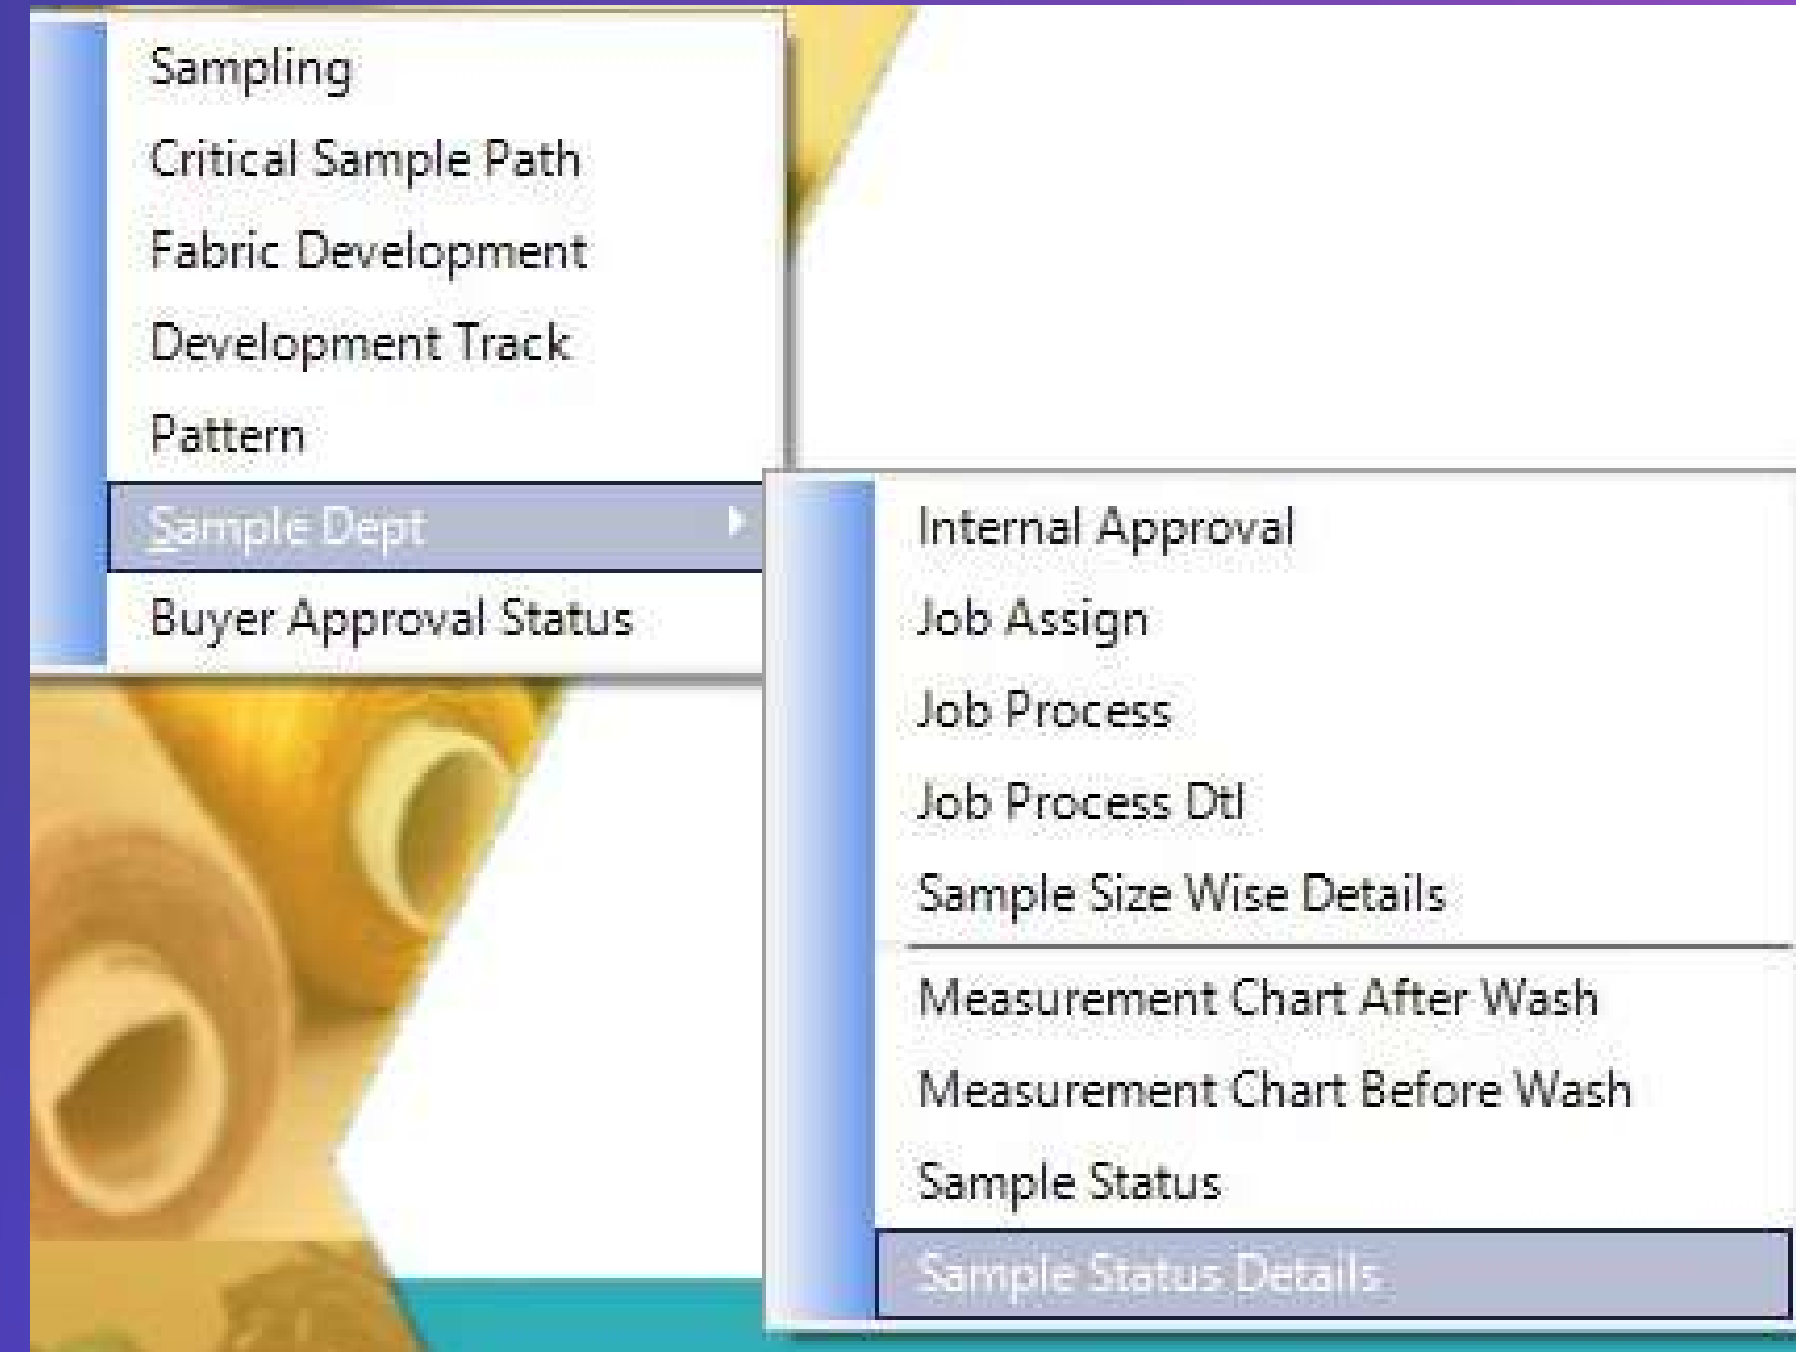

ASKTEK - ERP

Admin Access

provides secure control over user access, enabling user creation, privilege assignment, and deletion. Admins can view user history, check buyer logs, lock purchase orders and BOMs, and access additional screens for effective team monitoring and oversight.

Sample & Pattern Management

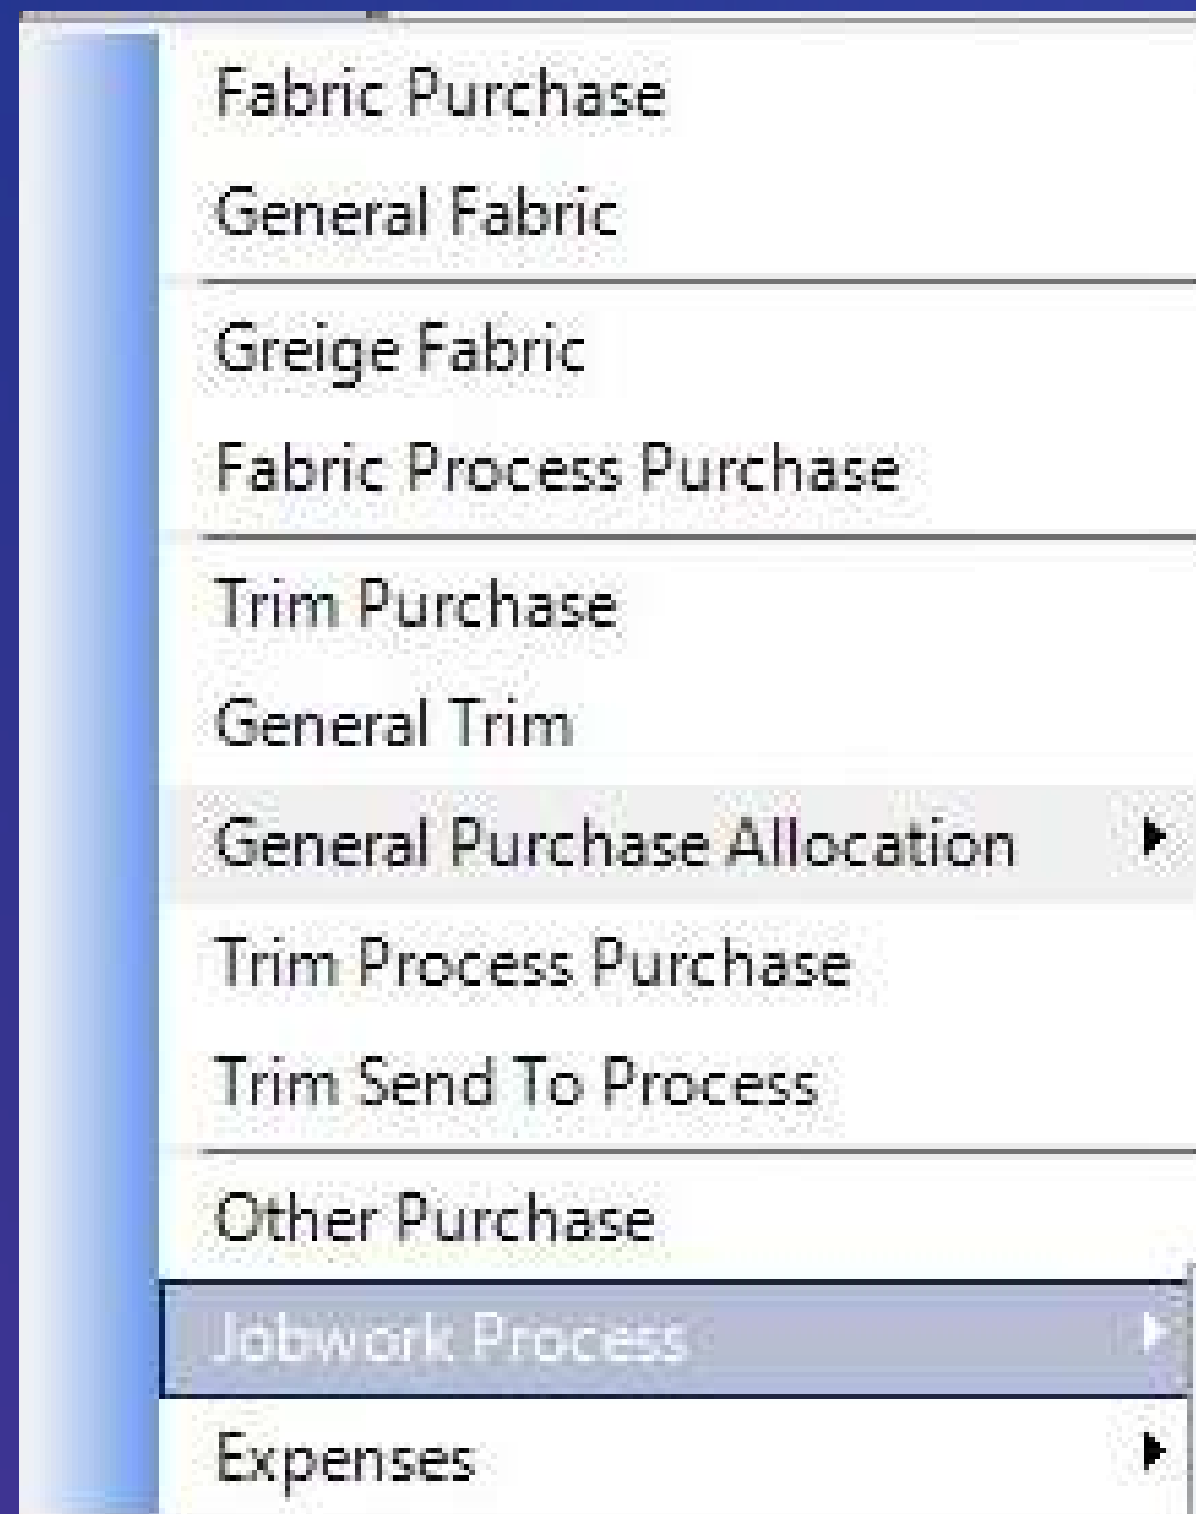

Asktek Apparel ERP streamlines sample development and pattern creation, tracking each step from approval to finalization. It ensures accurate job allocation, timely completion, and efficient product development.

ASKTEK - ERP

Purchase Management

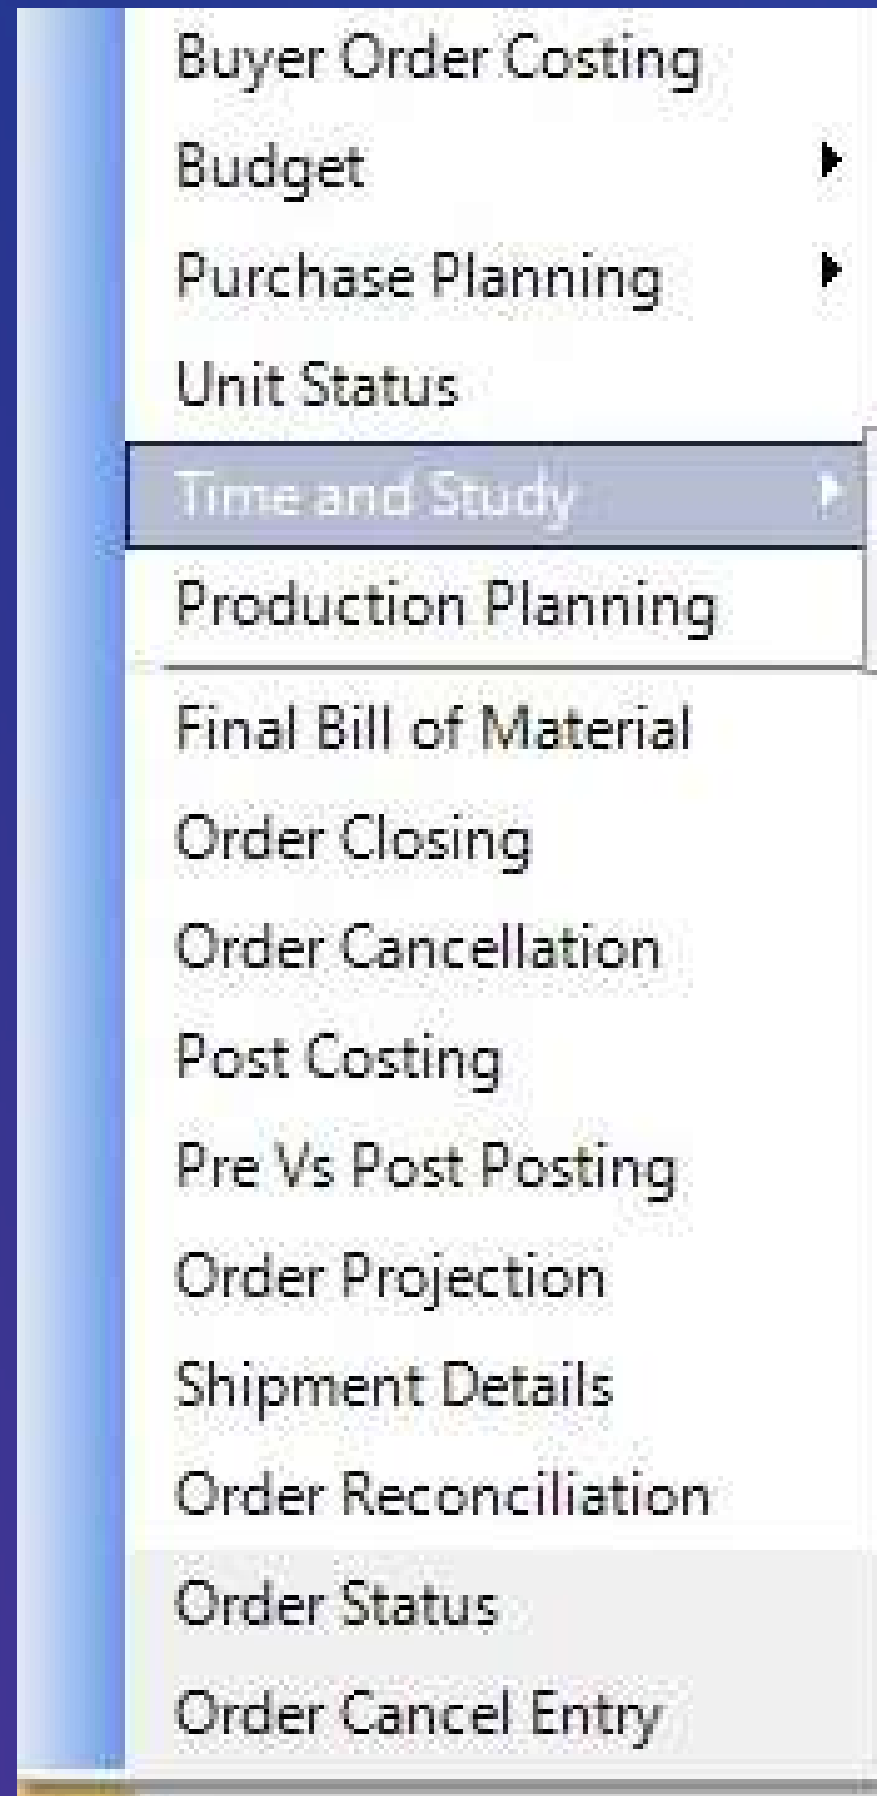

Streamline the entire purchase process from requisitions to supplier orders. Track purchase orders, monitor supplier performance, and ensure timely deliveries, optimizing inventory levels and controlling costs effectively.

Purchase Management

Asktek Apparel ERP & PLM streamlines the entire purchase process, from material requisitions to supplier orders. It tracks purchase orders, manages supplier performance, and ensures timely delivery, optimizing inventory and cost control.
